EDUCATION

University of California, San Diego

B.S. Computer Engineering — GPA: 3.6/4.0

Expected June 2027

La Jolla, CA

Relevant Coursework: Advanced Data Structures, Algorithms, Machine Learning, Computer Vision, Signals and Systems, Linear Algebra, Engineering Probability and Statistics

EXPERIENCE

AutomatiqGPT

Apr 2026 – Present

Full Stack Engineer Intern

San Diego, CA

- Engineered and shipped a React/Node.js admin console for a catalog of 175 AI bots (100+ in production), covering deployment status, metadata, and QA workflows
- Built an authenticated bot-builder pipeline (React, Express.js, Supabase) that converts natural-language requests into validated schemas, cutting manual setup time by 50% via draft-to-live promotion
- Refactored Supabase-backed Node.js services to support draft persistence, approval workflows, and live registry updates across static and user-generated bots

Triton Droids

Apr 2026 – Present

Embedded Systems Team

La Jolla, CA

- Developed MiniAloha's mobile-base and elevator control interface using a Python/Tkinter controller for ST3215 serial-bus servos, enabling keyboard-driven testing of translation, rotation, lift, and emergency stop commands
- Enabled SO-101 leader-follower arm bring-up by configuring LeRobot calibration, port discovery, and teleoperation workflows for two Feetech-based arms, reducing setup friction for repeatable hardware and simulation testing
- Supported Tactile Hands prototyping by contributing to the low-cost robotic-hand pipeline using ESP32-S3, force-sensing resistors, and ROS 2 interfaces for calibrated fingertip-force feedback and safer grasp testing

Inovasi Daya Solusi

Jul 2025 – Sep 2025

Quality Assurance Intern

Jakarta, Indonesia

- Improved API reliability by testing 50+ REST endpoints, identifying and resolving pre-release defects across services
- Reduced API response time by 25% by analyzing latency and optimizing database queries with indexing

PROJECTS

Career Copilot | *Next.js, React, TypeScript, Tailwind CSS, Prisma, PostgreSQL, Clerk, Gemini API, Zod* | [GitHub](#)

- Architected an AI-powered resume tailoring platform that parses PDF/DOCX resumes and job postings to extract role requirements and generate structured resume-to-role match analyses
- Validated Gemini-generated structured outputs with Zod schemas, rejecting malformed responses before persistence and downstream matching
- Implemented a secure full-stack workspace with Clerk authentication, Prisma/PostgreSQL persistence, usage tracking, and PDF export for tailored resume artifacts

NoteX | *Next.js, HTML, Tailwind CSS, Python/Flask, MySQL* | [GitHub](#)

- Created a full-stack note-sharing platform with secure note creation, storage, sharing, JWT authentication, and password-protected sessions
- Integrated rich text editing and real-time search to support formatted note authoring and content discovery

TECHNICAL SKILLS

Languages: C++, C, Java, Python, JavaScript, TypeScript, MATLAB, SQL

Frameworks/Libraries: React, Next.js, Node.js, Express.js, Flask, Tailwind CSS, Prisma, SQLAlchemy, ROS 2

Databases: PostgreSQL, MySQL, Supabase

Tools/DevOps: Git, Docker, Vite, Jest, Jira

APIs and Infrastructure: REST APIs, Stripe, Auth0
